

Isco ProHanger™

Securely suspend your equipment in manholes.

The ProHanger is designed to provide a sturdy and simple way to suspend down-hole equipment, eliminating the need to enter a manhole.

It's easily adjustable, and features double wingscrew locks. The low-profile tabs allow manhole covers to be set back in place and remain flush with the surface.

ProHanger is ruggedly built and is 100% stainless steel to prevent corrosion. It's rated for loads in excess of 1,000 lbs.

Suspension Harness Available

We offer stainless steel suspension harnesses for our portable samplers (example shown at left). They clip directly to the ProHanger, making sampler placement quick and convenient.
